WORK EXPERIENCE

BrandMuse

AI Product Intern

May 2026 – Present

- Led end-to-end development of Muse Score, a proprietary brand-creator fit algorithm integrating vector embeddings, audience engagement metrics, content themes, and demographics to generate compatibility score
- Improved LLM response relevance by **30%** by building a vector-based RAG over a curated marketing corpus
- Drove **21** client calls (Lego, Unilever, ELF, etc.) by launching and running company Substack as outbound marketing

Campus Enterprises

Technology Director

Jan 2026 – Present

Durham, NC

- Technical lead for GoBringIt, food delivery platform enabling meal-plan purchases at restaurants generating **\$500K+** yearly
- Manage client-side app and restaurant-side app that support **20** drivers, **6+** client restaurants, and a **6K+** customer user base
- Built and supported core tools, including customer service credit system and admin tools for menu and hours management

DearLegal

Software Engineering Intern

Jun 2025 – December 2025

- Spearheaded comprehensive company rebrand from HeyLegal to DearLegal, implementing updated color palettes, fonts, and website layouts using React and Sanity
- Redesigned case marketplace into a responsive card-based layout, increasing attorney conversion rates by **15%**
- Built end-to-end workflows for family and immigration law that bring in **80+** new cases weekly

Illinois General Assembly

Tech Policy Legislation Author

Aug 2020 – Present

Springfield, IL

- Conceived, wrote, and passed the nation's first law protecting child influencers and their income
- Spearheaded bill passage in **5** other states, including CA and UT, and introduced bill in **11** additional state legislatures
- Gained sponsorship for the bill by independently pitching to **40+** legislators and authoring **9** memos and tech policy briefs
- Garnered national coverage about myself and work from publications like [AP News](#), [The New York Times](#), [CNN](#), and [CBS](#)
- Collaborated with engineers at Meta and Google to develop screening tools so minors can request removal of their content

PROJECTS

RecycleRight: Developed a web app with a PyTorch classifier (**97%** accuracy) to help citizens sort recyclable materials via photo and access ZIP-code based disposal facilities nationwide, adopted by McLean Ecology Action Center w/ **600+** uploads

Racism Free Schools: Built a high-traffic advocacy website for the [Racism Free Schools Act](#), mobilizing thousands of visitors into 100+ registered bill proponents and contributing to the bill's successful passage in 2023
